3. Claims 4, 7, 16, 23, 38, 40, and 42 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Regarding claims 38, 40, and 42 the closest prior art of Masuda et al. ("A robust method for registration and segmentation of multiple range images" Masuda, T.; Yokoya, N.; CAD-Based Vision Workshop, 1994., IEEE, Proceedings of the 1994 Second , 8- 11 Feb. 1994 Pages:106 - 113) discloses to detect motion in range images by first transforming/deforming the first range image and comparing the transformed image to a second range image. Masuda does not teach, alone nor in combination with the other prior art, the features of "segmenting the range image of the object in units of voxels according to a distance value of the range image" and wherein "the deformed image is generated by deforming the range image based on a position of the voxel," these, in combination with the other respective claim limitations.
